

## PROFILE

I am a seasoned senior software developer with a very wide range of experience gathered over years working for a variety of different small to enterprise organisations. For the past six years I have been entirely remote, working as a Senior Developer and helping to run teams, while continuing to revel in the process of writing and shipping software.

In the evenings I work on a number of private projects such as [www.tourn.ee](http://www.tourn.ee) and [www.crownport.net](http://www.crownport.net) to develop my skills, and support the communities that I am part of in my private life. I am also in the process of renovating an Old School in Bulgaria, a blog I update can be read here: <https://oldschoolbulgaria.blogspot.co.uk/>

Playing with my daughter  
Painting Miniatures  
Creating Terrain  
Reading and Walking

# ANDREW COX

Senior Developer

## WORK EXPERIENCE SUMMARY

### Connect Child Care – Senior Developer

April 2019–Date

I joined a very junior team taking over software from an outsourcing company attempting to understand and ship hitting aggressive targets. The software went live on time, and is now in the wild.

*Technologies:* Angular, dotnet core (c#), entity framework, AWS, docker, MSSQL

### Blockpool Ltd – Senior developer -> Head of Development

March 2017–September 2018

When I began working with Blockpool it was doing project work however very quickly I was taken on full time, advancing to Head of Development running an international distributed remote team of developers. I remained hands-on throughout however.

*Technologies:* Angular, nodejs, MongoDB, PGSQL, SAML, OAuth2, blockchain

### Nobel Biocare – Senior Developer

July 2016–November 2016

I was brought on by Nobel to mentor a team of junior developers writing control software for Dental chairs, and specifically the cleaning and maintenance cycles. It was a deliberately short contract onsite to push them over the delivery line, which I achieved.

*Technologies:* Angular (1.5 -> 2), WebAPI, dotnet (c#), PGSQL
